MAIL STOP REISSUE

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicants: S.M. Stedman et al. Attorney Docket No.: NETM117389 #14  
Application No.: 10/032,988 Group Art Unit: 2153 4 BSA  
Filed: December 27, 2001 Examiner: M.M. Meky  
Title: METHOD OF ACCESSING INFORMATION ON A HOST COMPUTER  
FROM A CLIENT COMPUTER

STATUS LETTER REGARDING NON-RECEIPT OF  
SURRENDER OF ORIGINAL PATENT

4 BSA

not in office 12/19

RECEIVED

Seattle, Washington 98101

April 7, 2004

APR 14 2004

TO THE COMMISSIONER FOR PATENTS:

Technology Center 2100

**Attn: Examiner Moustafa M. Meky**

Regarding the above-referenced reissue application, and in response to our telephone discussion of April 6, 2004, wherein you indicated you had not yet received our Surrender of Original Patent, I present this status letter and attachments for your review and consideration. Attached to this status letter are copies of the following: Surrender of Original Patent as presented to the United States Patent and Trademark Office via Express Mail on March 15, 2004; copy of the first and second pages of original Patent No. 6,081,837; copy of our postcard acknowledgement of receipt; and a copy of our postcard evidencing receipt by the OIPE on March 18, 2004 of the Surrender of Original Patent. Because this filing has not yet been received by you, I am presenting this status letter and copies of the Surrender of Original Patent for your immediate consideration. You indicated in a telephone discussion with my secretary on April 6, 2004, that you wished to have this Status Letter mailed to Box Reissue with copies of the original filing and that you would wait for a period of approximately one week before taking any action, in hopes that our March 15, 2004 Surrender of Original Patent would be forwarded to you internally at the United States Patent and Trademark Office within that time period.

TO THE COMMISSIONER FOR PATENTS:

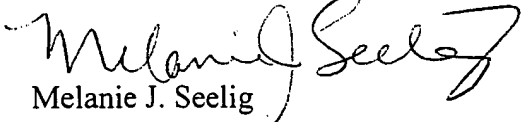

Wall Data Corporation is the assignee of the entire interest in the original Letters Patent, U.S. Patent No. 6,081,837 (the "'837 patent"), which is the subject of this reissue application.

Pursuant to the Offer to Surrender Original Patent (37 C.F.R. § 1.178) and Assent of Assignee as well as the Certification of Ownership Under 37 C.F.R. § 3.73(b) filed concurrently with the reissue application on December 27, 2001, the '837 patent is now herewith being surrendered.

We submit that the application is now in condition for allowance. If the Examiner has any questions regarding this matter, the Examiner is invited to contact the undersigned attorney at the number below.

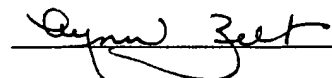

Respectfully submitted,

CHRISTENSEN O'CONNOR  
JOHNSON KINDNESS<sup>PLLC</sup>

The Director of the United States  
Patent and Trademark Office

*Has received an application for a patent for a new and useful invention. The title and description of the invention are enclosed. The requirements of law have been complied with, and it has been determined that a patent on the invention shall be granted under the law.*

*Therefore, this*

United States Patent

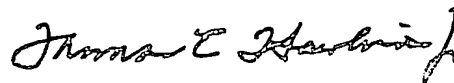

*Grants to the person(s) having title to this patent the right to exclude others from making, using, offering for sale, or selling the invention throughout the United States of America or importing the invention into the United States of America for the term set forth below, subject to the payment of maintenance fees as provided by law.*

*If this application was filed prior to June 8, 1995, the term of this patent is the longer of seventeen years from the date of grant of this patent or twenty years from the earliest effective U.S. filing date of the application, subject to any statutory extension.*

*If this application was filed on or after June 8, 1995, the term of this patent is twenty years from the U.S. filing date, subject to any statutory extension. If the application contains a specific reference to an earlier filed application or applications under 35 U.S.C. 120, 121 or 365(c), the term of the patent is twenty years from the date on which the earliest application was filed, subject to any statutory extensions.*

[57] **ABSTRACT**

A method and apparatus for accessing information on a host computer 106 from a client computer 104 utilizing an intermediate server computer 108 that is connected to the client computer by a network. The host computer transmits a presentation space data stream representing a host screen to the server computer. The server computer creates an HTML document based on the information received from the host computer and transmits the HTML document to the client computer. The client computer creates a Web page based on the HTML document. The Web page includes fields and controls that implement the functionality of the host screens while presenting an improved user interface. A user can create HTML templates that substitute for the automatically created HTML documents for any one or more of the host screens. The server computer inserts session identifiers within the URLs that are contained in the HTML documents, and uses the session identifiers to maintain separate connections between multiple host computers and a single client computer.
